Thanks, Patrick. If you want to roll it in to that, that works for me.

Thanks for the email. That shouldn't be a blocker. We can do that as part of a deal to get XRP/fiat pairs on [REDACTED] I catch up with [REDACTED] today to make sure we keep things very simple.

Does this work for you?

Hi Patrick,

Things are going great over here. We'd appreciate if Ripple Labs could cover the ~13m XRP loss we took on nearly 2 years ago (we've been asking since). It was actually significantly larger but we managed to get some users to make some returns.

Thanks,

Been a while and hope you're doing great. What amount of XRP did you have in mind for us to get a deal done together?

Call me anytime [REDACTED]

Hi [REDACTED]

We'd love to help. First order of business would be to settle up the xrp losses we took on from the tptrialpayments issue. Run it by your people and let me know if we can work something out.

Hi [REDACTED]

I'm reaching out from the business development team at Ripple, where [REDACTED] (cc'ed) and I work on strategic initiatives around liquidity and XRP.

Are you available for a call sometime on Thursday with Ripple and [REDACTED] from [REDACTED] to discuss listing XRP further? [REDACTED] is interested in this, and I have been engaging preliminarily with [REDACTED] (cc'ed) on this as well.

We are focused on listing XRP on exchanges globally based on demand from our partners. Specifically, we have been working with [REDACTED] and the [REDACTED] team to list XRP at the exchanges that they use. Listing XRP/fiat pairs at Kraken is a top priority for us and [REDACTED]

The advantages of using XRP are for remittance payments and speculative/arb trading. Due to the fast confirmation of XRP on the Ripple Consensus Ledger (3-6 seconds), it is well-suited as an asset for use in remittances via crypto exchanges as well as for carrying out cross-orderbook arbitrage. We will also be implementing forthcoming XRP incentives that will offset exchange fees for traders, supporting greater fee revenue for Kraken.

I hope this context helps. Please let me know if you have any questions.

We look forward to being able to team up with [REDACTED] to implement this.

Thanks,
